

Aspexx Corporation

Despite its size and prolific growth across the galaxy, the Aspexx Corporation is not, as any lawyer will tell you, a monopoly. Their competitors are legion and varied, and they of course have to fight tooth and nail to maintain their place in the galaxy. From selling products for day-to-day life, to software, to Various genetics, to weapons development: Aspexx simply can't help itself from trying to make the galaxy a better place!

The size of their R&D facilities isn't a mark of any sort of drive to crush competition by employing all of the galaxy's researchers, don't be absurd, it's a simple fact that the Aspexx Family offer competitive employment packages that make them attractive employers! Sure, oftentimes when a new innovation comes from outside of Aspexx some facsimile appears in Aspexx's shelves, but that's just how innovation works! Back alley deals and intimidation tactics? Oh, don't be silly - you could find yourself on the wrong end of a lawsuit for saying that! Could you just recant that? In writing?
