## Rank 3

### Experimental Surgery

- You are capable of improvising biological interventions outside of a combat situation.
- Inform the Ref you wish to perform some experimental surgery on an unresisting target.
- You can then attempt the surgery to achieve some end depending on the power level of the surgery:
  - **2 Power Levels** - **HEAL FULL**, or **GAIN** some call.
  - **3 Power Levels** - remove some deleterious effect, or bestow a more substantial boon for multiple encounters.
  - **5 Power Levels** - modify the penalty of a severe wound, or provide some permanent bonus with an appropriate drawback
- Use the **Medical Mishap Deck** to determine the power level of your Surgery and any Mishaps that may occur.
- Inform the Ref when you have done this, what you wish to have achieved, and they will discuss the outcome with the patient.
- Mishaps from the Medical Mishap Deck will only ever deleteriously affect the Medic, not the patient.

Example:

- *You decide that your compatriot could do with being unhindered on their legs and would like to strengthen them surgically.*
- You play the Mishap deck and result in a power of 3 with 1 Mishap.
- You: "I strengthen their legs!"
- *The target receives the ability to redistribute BREAK effects delivered to their legs to their arms for 3 encounters, but the Medic suffers a Mishap.*
