

Bestiary - Software

This Bestiary is a semi-IC document containing Monster stats and information for various enemy types encountered and encounterable in the world of Planetfall. It is safe to assume information here is IC available for your perusal thanks to the Zeitgeist Research Department. Anyone is free to edit this information and add Monsters of their own creation.

Software

Civilian.mp40

You are a standard training program designed to be a civilian that needs protecting. Since you're part of a broken down holodeck you're accidentally spliced with a bandit program and so you'll try to lure the players into a false sense of security then have a personality heel-face-turn and try to murder them.

- 12 hits
- 1 concealed weapon (pistol or knife)
- Spend 2 hits to call YOU LOT: PEW with a pistol or BREAK with a knife.
- **NoClip** - 2 uses of WARP, 10s of movement, then unwarp.

ErrorShit.bat

The holodeck is splicing different programs into this one. Flick between the following programs every 30s or every 5 hits whichever comes first. All of these personalities can only do melee damage and move at a slow walking pace. You can't be damaged but can be ignored.

- **Fire Drill** - You are an emergency training program designed to teach people the importance of reacting to a fire. Command someone to stop, drop, and roll. If they do not, you may call BURN on them by melee.
- **Hull Breach Drill** - You are an emergency training program designed to teach people the dangers of depressurisation. If you reach someone, yell "HULL BREACH LOOK OUT!", follow up with PULL and then run as far away as you can with them trailing behind you.
- **Mining Drill** - You are a character from a popular mining simulator in which you play a many legged Chirrid prospector. Mine the players with infinite STRIKEDOWNS.

Securit.exe

You are a standard training program designed to teach recruits advanced combat manoeuvres on dangerous elements. Since you're part of a broken down holodeck you're not exactly working correctly...

- 12 hits
- 1 melee weapon
- 1 shield

- Spend 2 hits to call STRIKEDOWN
- Every 3 hits that strike your shield call PARRY
- **Hacks** - Spending 10s uninterrupted out of combat in a T-pose with your head pointed to the sky yelling random binary allows you to call HEAL SELF FULL. If you are struck during this time call MASS STRIKEDOWN. You cannot attempt this again for 60s if you fail in this way.
