

Master Languid Relaxation, 1413

Pronouns: He/they

Background / Bio

A moderately ranking dynast, sent on a grand tour of the systems after the untimely death of their fathers in a tragic space-yachting accident. Unfortunately, they were on the wrong side of the gate in this “backwater wasteland” when it exploded.

Ambitious, imperious, and with a hankering for the “good old days”.

Mark 2

- Rebreather: You may provide up to three members of your party (including yourself) with an efficient rebreather that can provide up to 1 hour of air underwater or in low (or no) O2 environments. Inform the GM of this when it is relevant, it should provide some bonus to you where negative effects would otherwise be conferred due to low O2 availability.
- Gravity Generator: activating this during encounters with the Low Gravity modifier will allow you and your party to ignore this effect while close to large metal objects.
- Fireproof Armour Technique: When you provide armour improvements you may instead of providing hits provide 2 x PING BURN to the target, or can provide 2 x PING BURN to self in place of improving armour of another.
- Eggs-ray scanner: 1/ adventure, out of combat, you may scan an unshielded container to determine the properties of its contents
- Mark II Stealth Suit - once per encounter you may choose to ignore a SCAN call that would apply to you. You may put this on overdrive once per Mission to ignore 3 SCAN calls during the same Encounter, at the expense of losing the ability for the rest of the Mission.
