

# Temporary Impulse

*Pronouns: she/her*

## Background / Bio

An engineer of no particular affiliation, Temporary Impulse arrived in the Keter System on Muse IX. If you ask her, she came here to check out employment opportunities on Mytene.

[Note: Temporary Impulse's name is a bit of an, er, temporary impulse. She has already gone by Transient Impulse and is likely to keep changing the adjective whenever she thinks of another one she likes better that day.]

  - (Mark II Adaptation): A Thing Repulsor attachment for her Adaptive Scanner: after scanning a downed enemy using Adaptive Scanner you gain 1 use per encounter of YOU: PUSH against any target matching the attribute you chose - though you will need to SCAN to determine what you can target. You can gain a further use of YOU: PUSH against such a target by spending 10 seconds loading your Thing Repulsor, at the cost of losing your scan data, meaning you will not be able to SCAN for that property for the rest of the encounter, and will have to re-use Adaptive Scanner to re-start the Thing Repulsor.

Also owns a small, lead-lined sample box with some air holes, which can be used to safely carry non-Decayed samples which fit into about a 1 foot cube without deterioration or risk of damage to her or the sample.
