

# The Various

The Various are, variously, individuals who have melded their biology with technology to the extent that where the organic ends and the inorganic begins is nigh impossible to tell. To a greater or lesser extent, all Various are Cyborgs with major technological enhancements - a status which is generally respected among most in the galaxy. Of the Various, there are three major categories:

**Technomancers** embrace the technological and push their machine parts to the extreme to acquire new abities, the **Transcended** see their enhancements as a stepping stone to a greater biological form, while **Scavengers** see necessity in balance and focus on maximising the utility out of their enhancements.

## Class Features

### Rank 1: Assimilation

- The Various can merge aspects of the world into themselves in order to empower various abilities. Some of their abilities will require specific elements to be harvested, but at base all harvesting bolsters a Various regardless of its affects.
- The Various have a base 8 hits.
- The Various may spend 5s of appropriate roleplay to call HARVEST on another character within reach who is unconscious, dead, or willing.
  - This process is incredibly painful and repeated exposure to it will have deleterious effects on the victim.
  - You may only HARVEST from each character once per encounter.
- HARVESTing a character will power Various effects.
- You may not gain the same effect from HARVEST twice in a row.
- Effects gained from HARVEST disappear after 5 minutes.

### Rank 1: Modularity

- The Abilities of the Various represent different augmentations and adaptations that they have made to themselves. To facilitate freeform costuming and characterisation, the exact form of these augmentations is left up to individual players, but broadly each Ability represents a new Augmentation that a Various has acquired / developed / salvaged.
- With access to a [Various Forge](#) (i.e. non-negative [Clout](#) with any faction with access to one), Various can change out their augmentations with assistance from the operators.
- Once per Downtime, with access to a Forge, a Various character can refund 1 XP and re-spend it on another Ability.
- Refunds and spends must still meet prerequisite requirements of having Abilities in lower ranks to access higher ones.

### Rank 1: Self-Repair Systems

- Calling HARVEST restores your body hits by half your maximum, in addition to any other effects.
- If the HARVEST is PING'd then you do not gain the hits.

### Rank 3: Autocannibalise

- At Rank 3, Various are able to completely give themselves over to their enhancements.
- Once per adventure you may activate this ability.
- You immediately regain all of your hits and may immediately power three abilities that require a HARVEST call.
- Until the end of the current encounter you will feel a drive toward your last goal before activating this ability - it is up to you how you wish to roleplay this.

### Rank 5: Ascension

- At Rank 5, Various are rippling with power and potential.
- Once ever, you may fully commit to either the Mechanical, Biological or Balanced side of yourself, taking a new form to represent your choice.
- **You will gain access to bespoke Rank 5 Abilities** which are the only way to acquire Rank 5 Various abilities.
- Discuss what form you would like to take with the Refs and what effects you would be interested in.
