Tinkering Deck

The Tinkering Deck is a deck of cards that governs how powerful and successful a Specialist's Tinkering is.

For the purposes of Playtesting, this will be done by a game of 21:

- The GM has a deck of cards.
- The Tinkerer may choose to DRAW another card or STICK with the value they have.
- If a picture card is drawn, a side effect will occur for the Tinkerer. For each picture card, the consequence severity will increase. Picture cards do not add to the total.
- Aces are 1.

Value	Result	Consequences
< 16	Failure	None
16 - 18	Minor Success	Occur
19 - 20	Major Success	Occur
21	Perfect Success	None
> 21	Catastrophic Failure	Occur

Results

- **Failure** - it didn't work, nothing happens
- **Minor Success** - some of what was being attempted works, equivalent power of gaining three additional calls for use over the rest of the Mission.
- **Major Success** - all of what was being attempted works, equivalent power of gaining an additional call per encounter for the rest of the Mission.
- **Perfect Success** - all of what was being attempted works, with an additional positive side effect decided by the GM.
- **Catastrophic Failure** - what was being attempted fails to work and backfires in a way decided by the GM.

Consequences

- Consequences are mechanical or roleplaying effects that add a twist to the roleplaying of the Tinkerer for 2-3 Encounters.
- These can either be taken from a list of options or created on the spot.
- Examples:
  - You are incapable of speaking more than 5 words in a sentence at a time.
  - Your maximum hits are temporarily reduced by 4.
  - When you take a STRIKEDOWN, you must stay on the ground for 3s.
  - When you take a PUSH you arc uncontrollably to the left.
  - Whenever you call PING you must also call YOU: PEW at an ally.
  - Your pool of MISS from being in cover is reduced by 1.
  - All food tastes bad.
  - The first time someone makes a call in an encounter take an EFFECT: TERRIFIED from them.
  - Whenever someone is subject to BLAST take an EFFECT: DEAFENED.
